Number of Students

INDICATOR DESCRIPTION

MEASUREMENT BASIS

The number and structure of the student body is a strategic and operational indicator reflecting:

- the total student population;
- its distribution across faculties, fields of study, study programmes, study levels and modes of study;
- student origin (Latvian and international students).

It reflects the diversity of the student portfolio and the institution’s ability to attract domestic and international students across different modes of study.

MONITORING AND USE

Key indicators, including the total number of students and the proportion of international students, are compared against the planned and revised targets.

The indicator is used to monitor student recruitment, study programme development and institutional planning. It is also analysed over time, enabling comparison across several years.

RISEBA TARGET

Total number of students

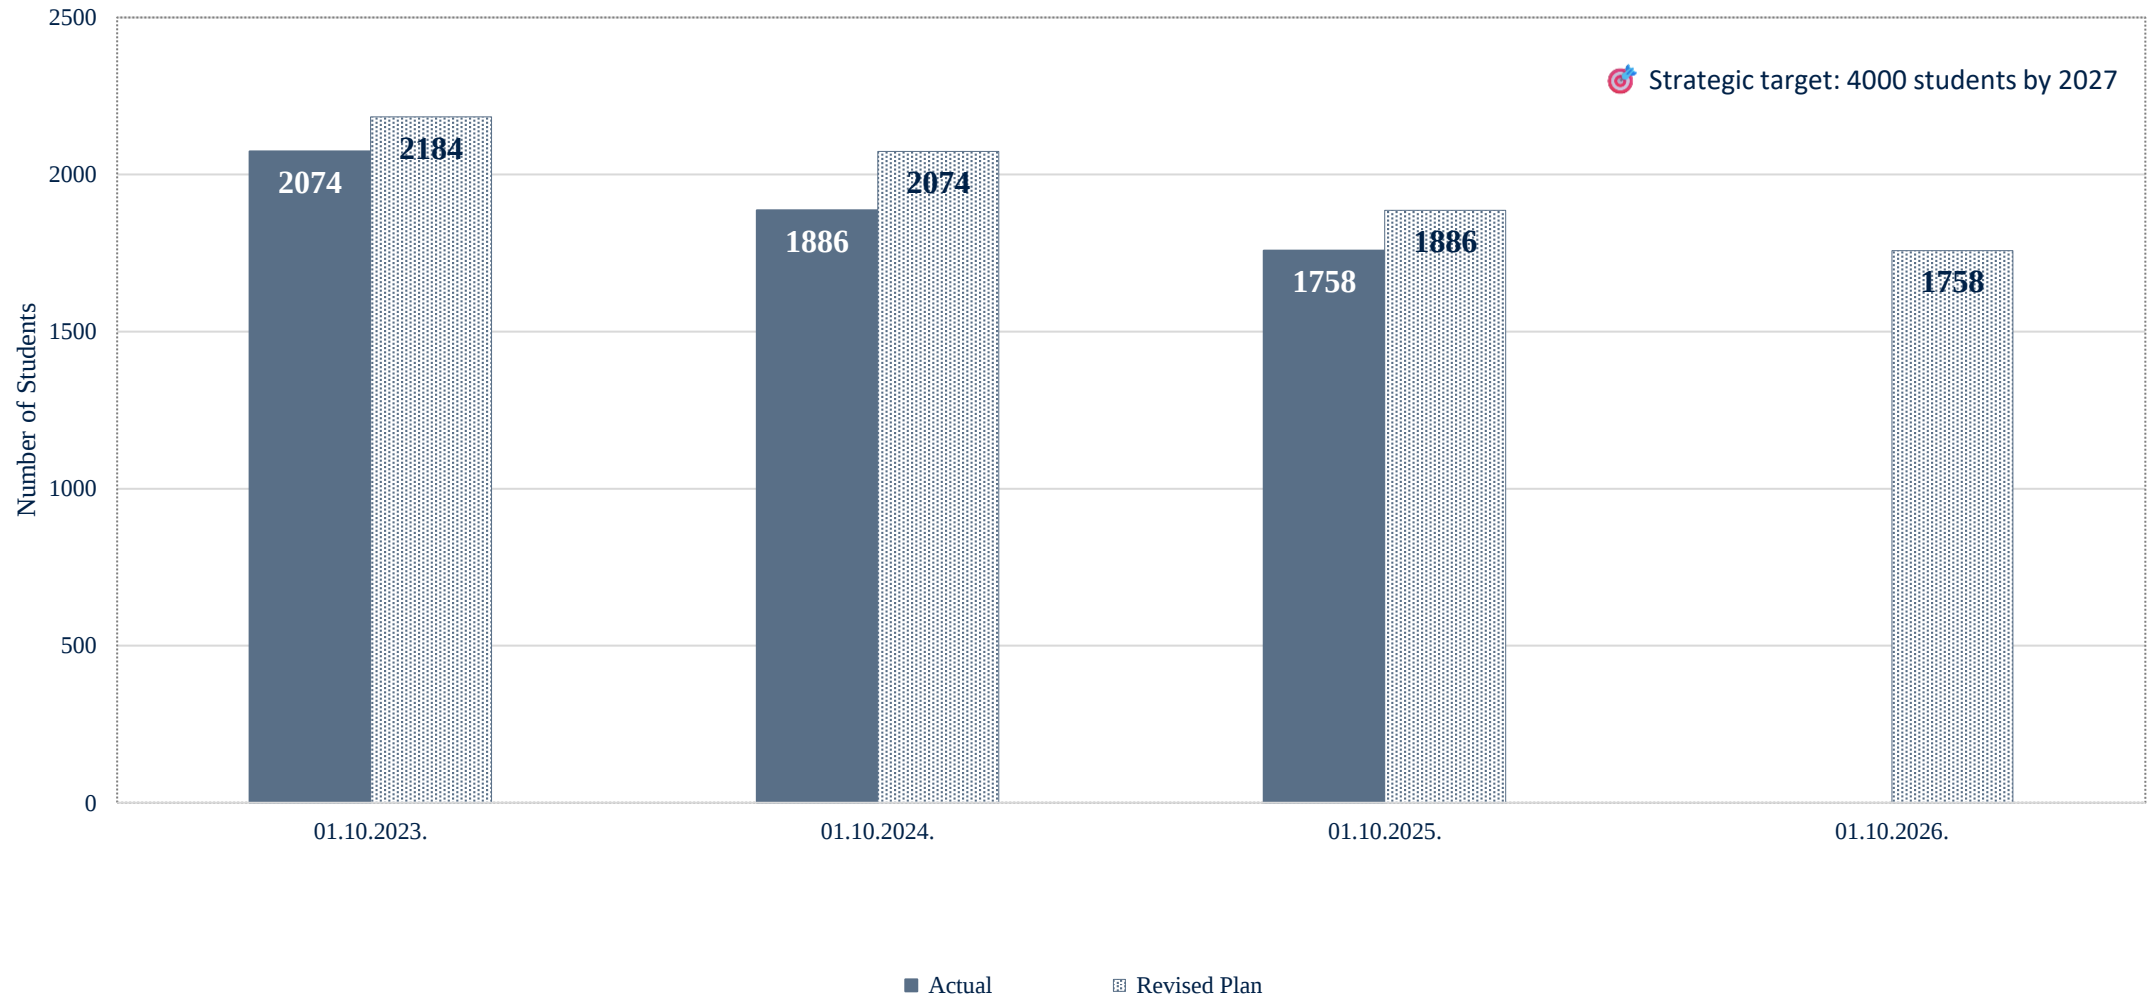

4000

students

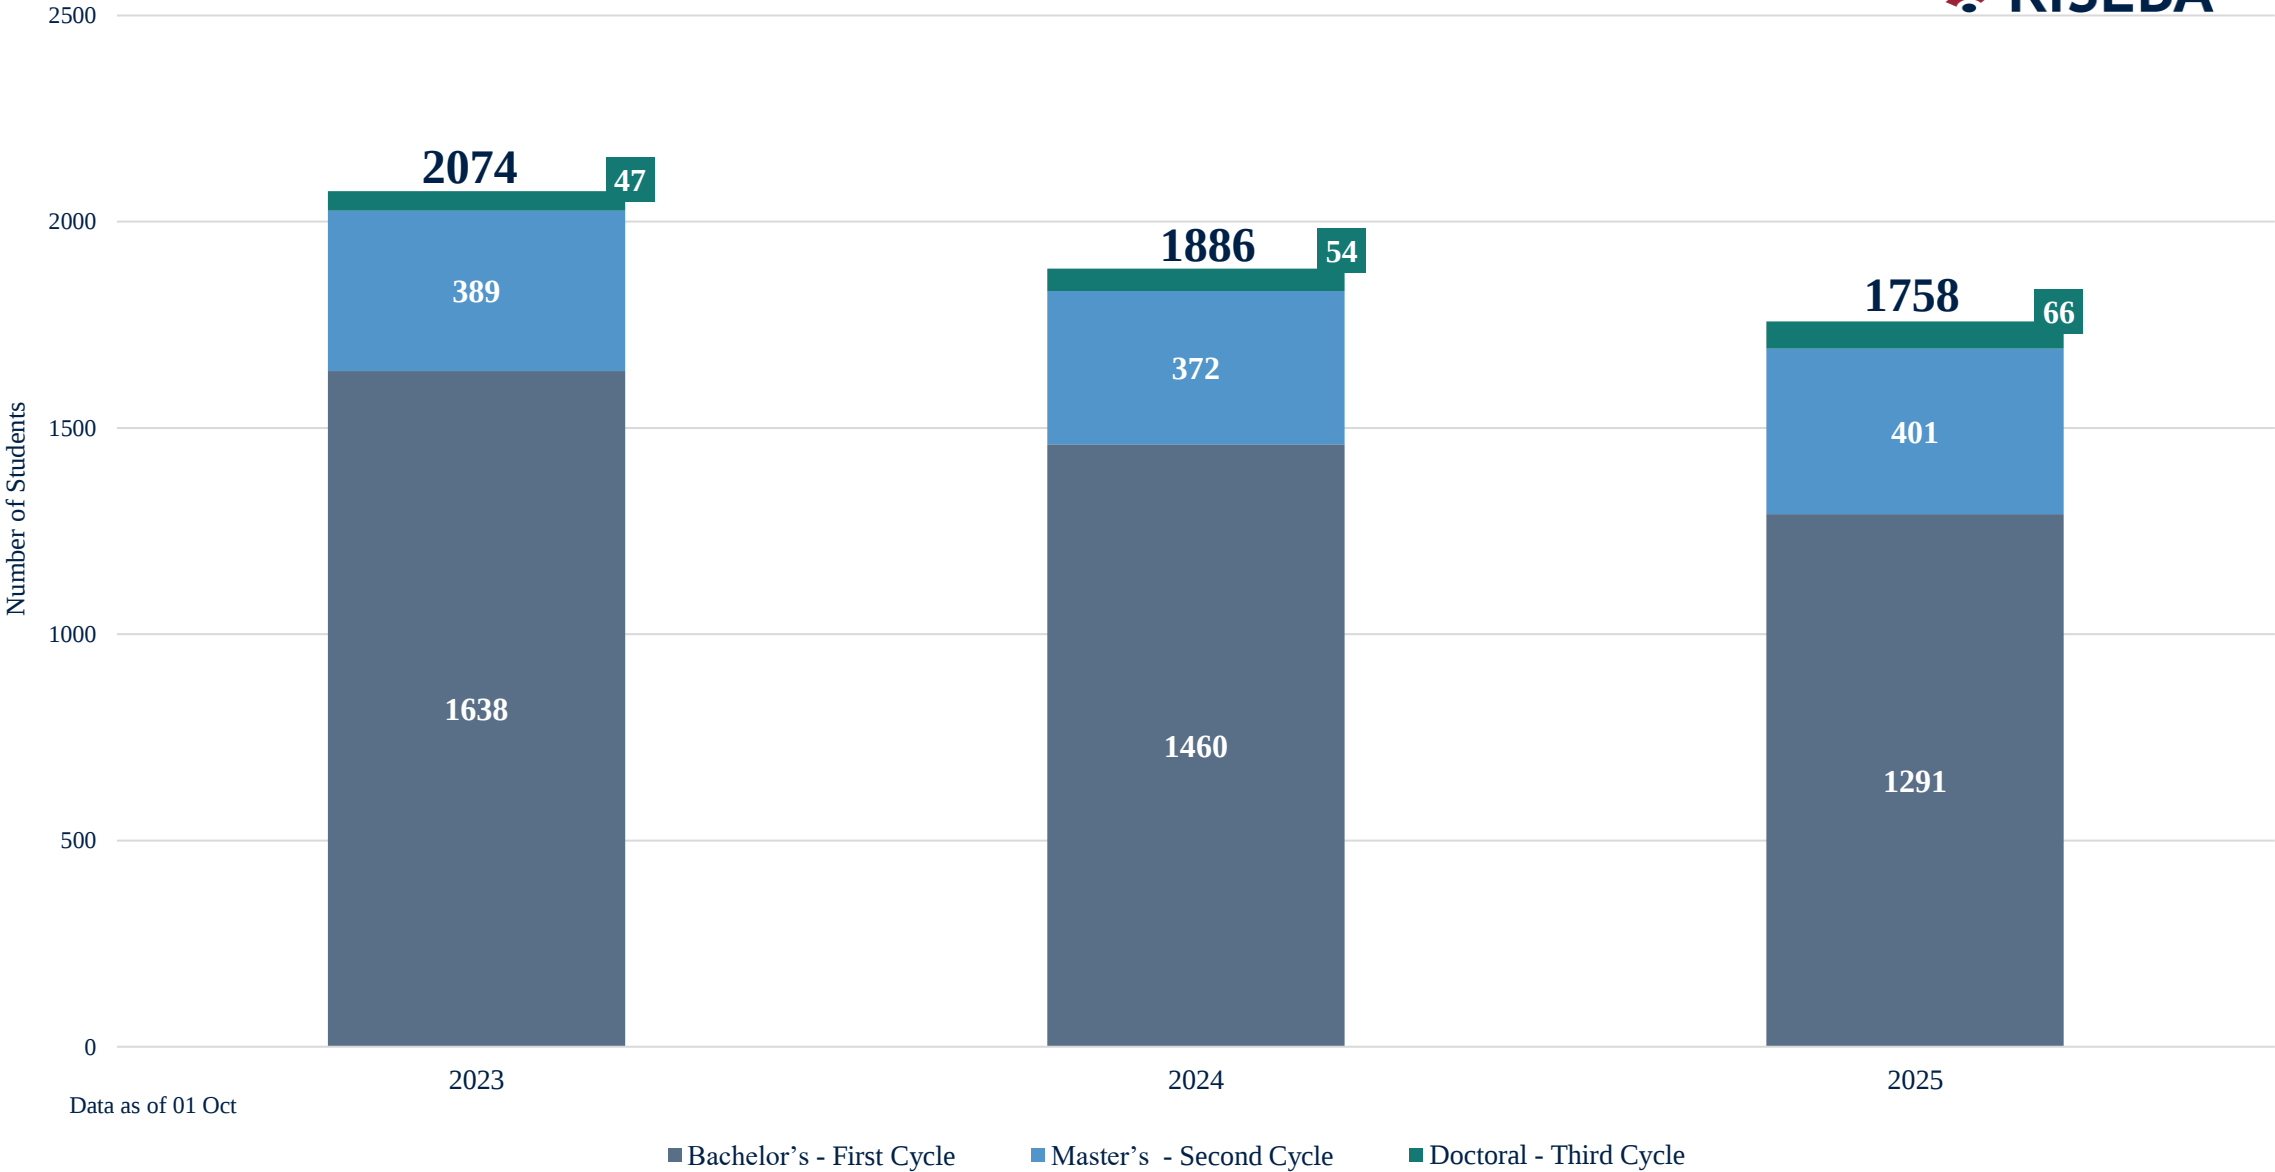

Planned institutional target for the total student population

Monitoring: total student population • student structure • international student proportion • multi-year dynamics

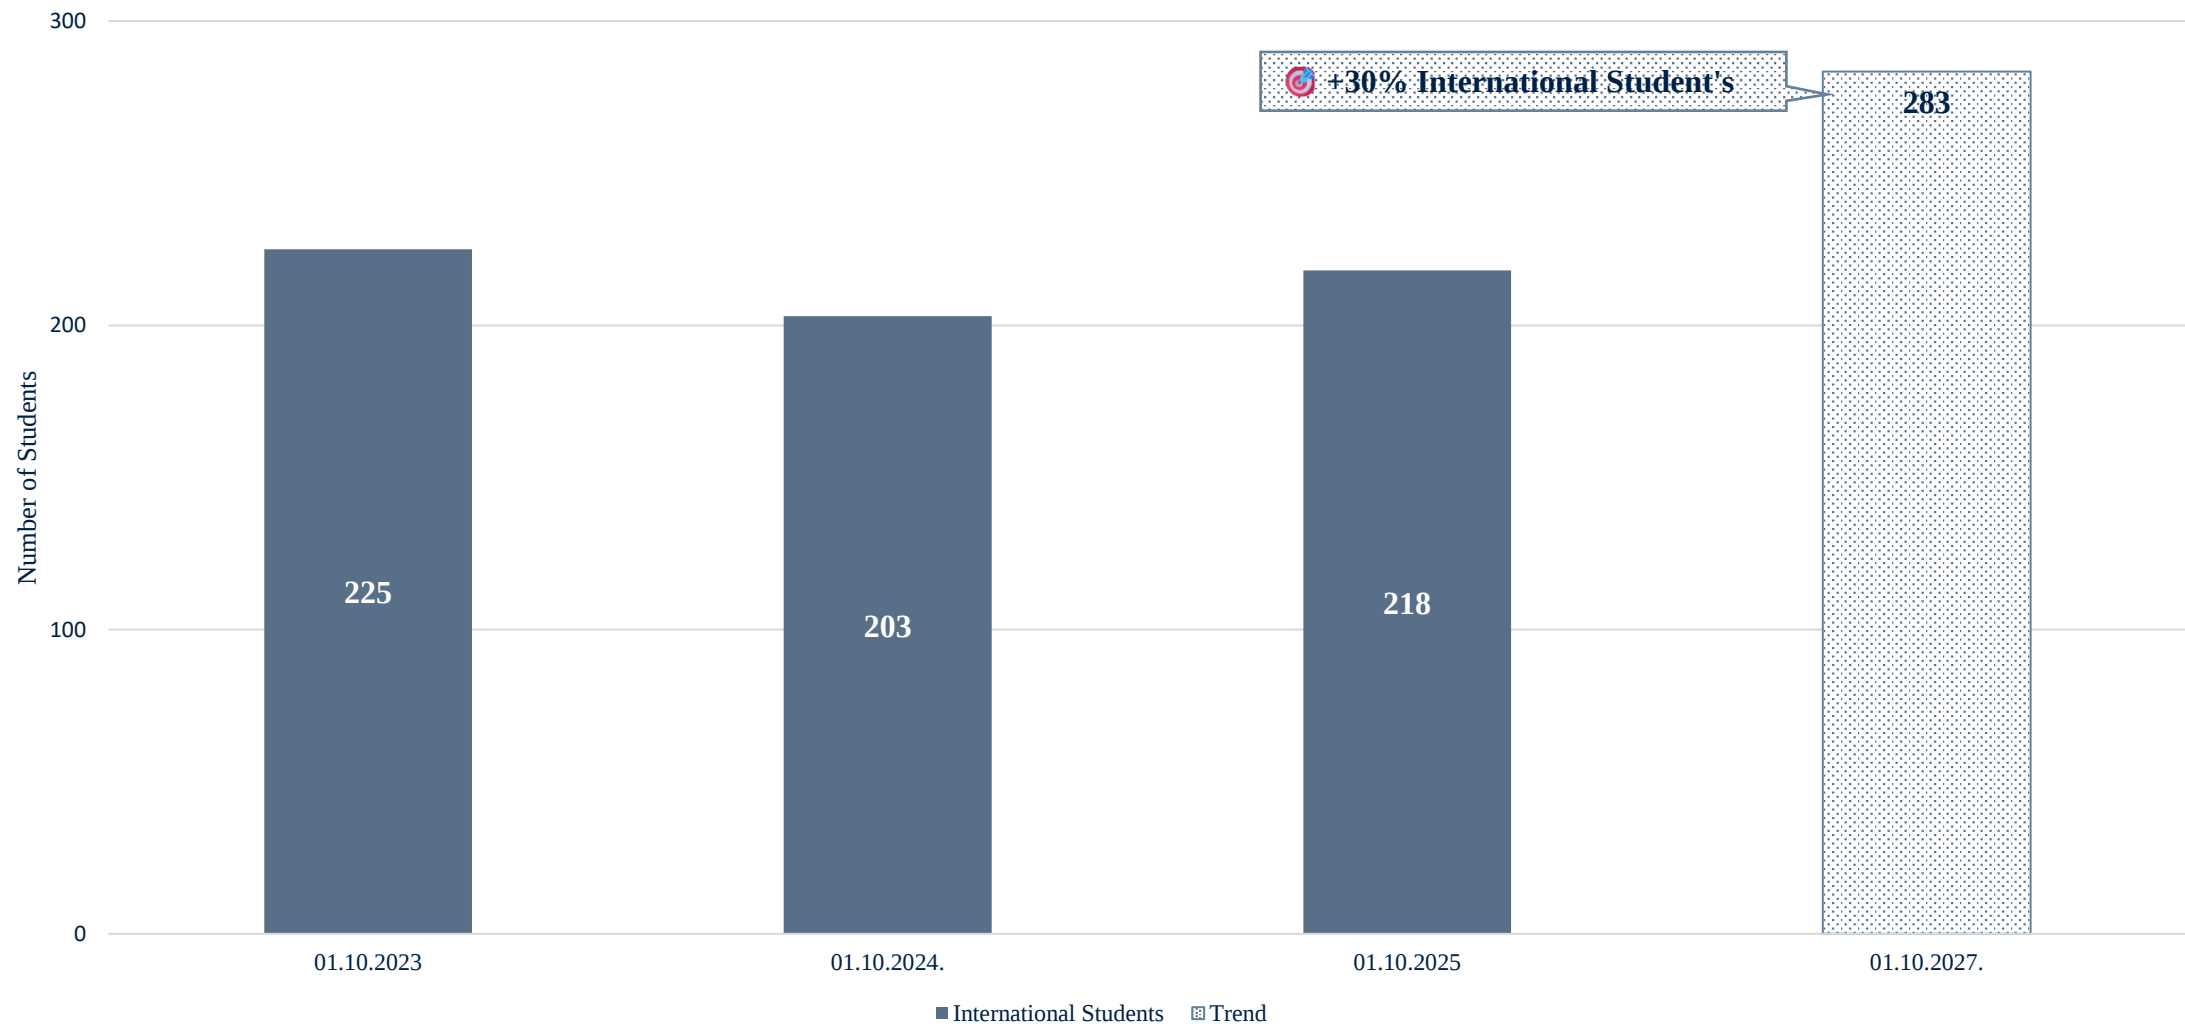

Student Enrolment

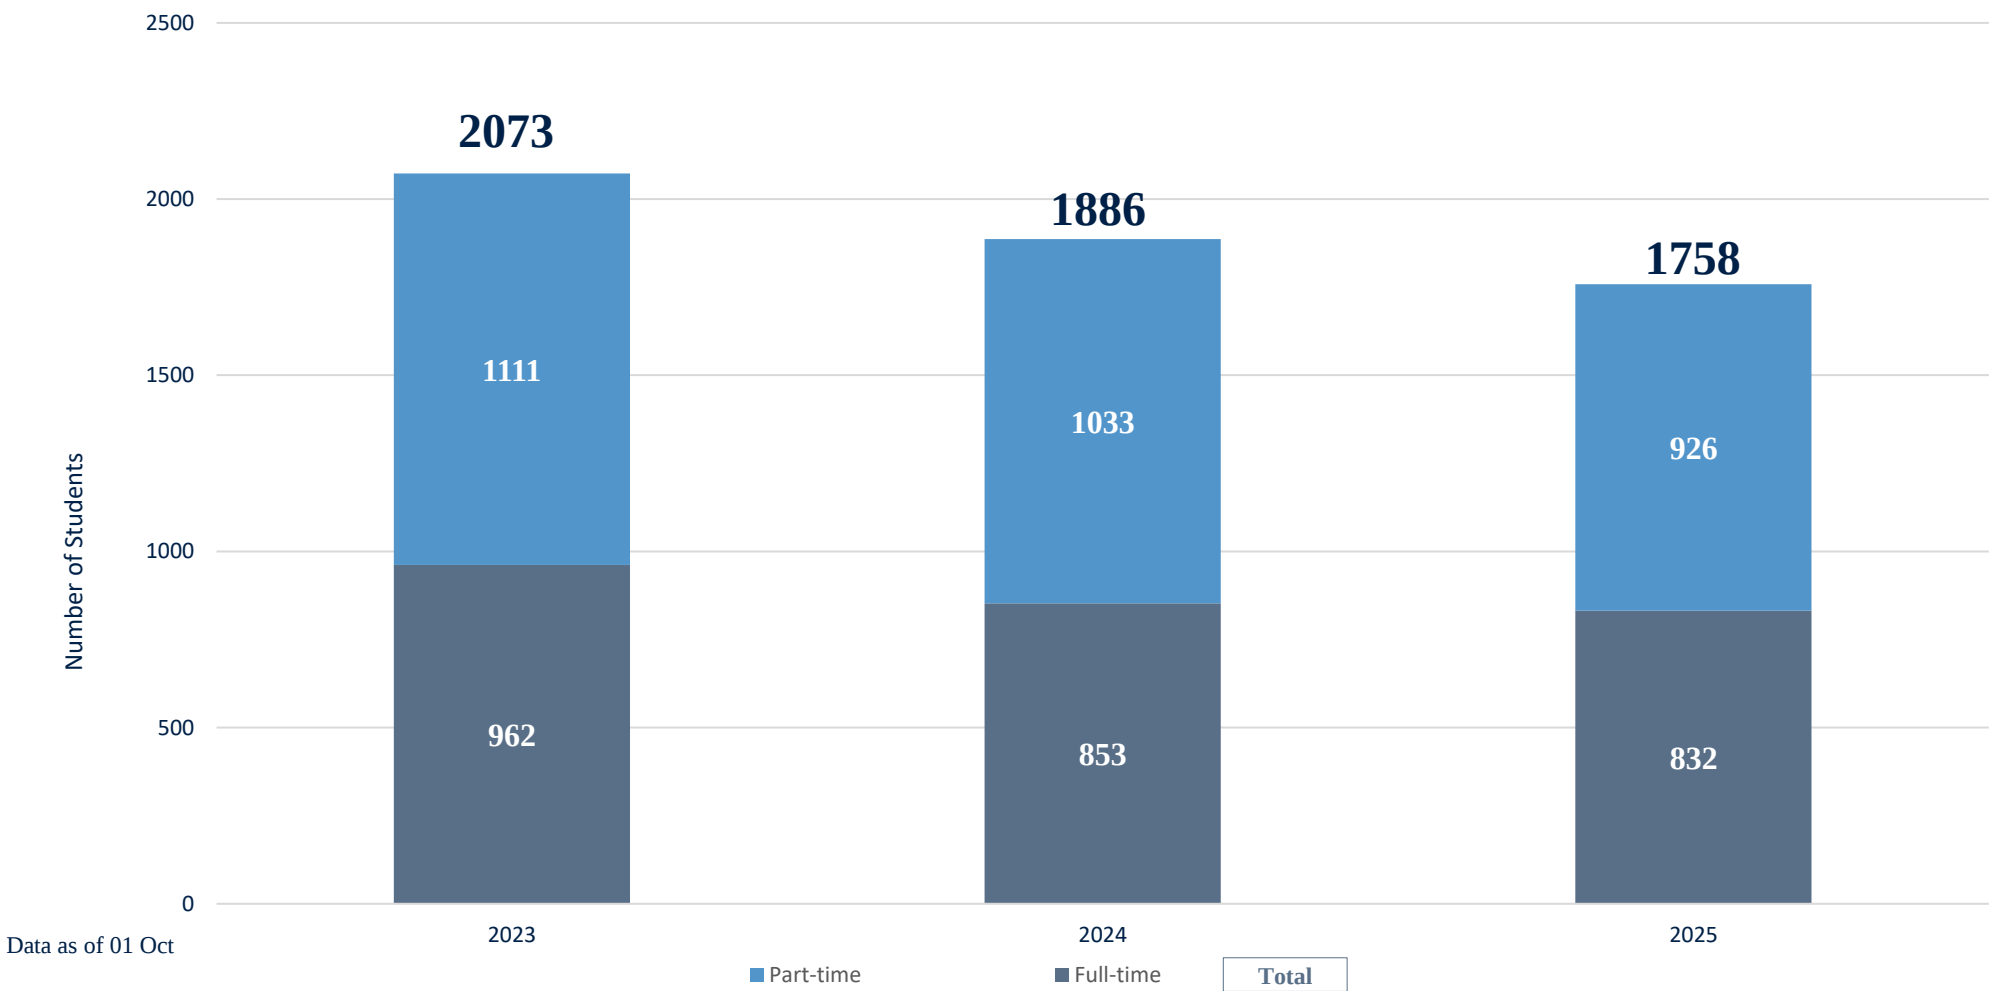

Number of Students by Level of Study
