KPI definition and strategic purpose

External funding attracted through projects and contract work initiated during the reporting period.

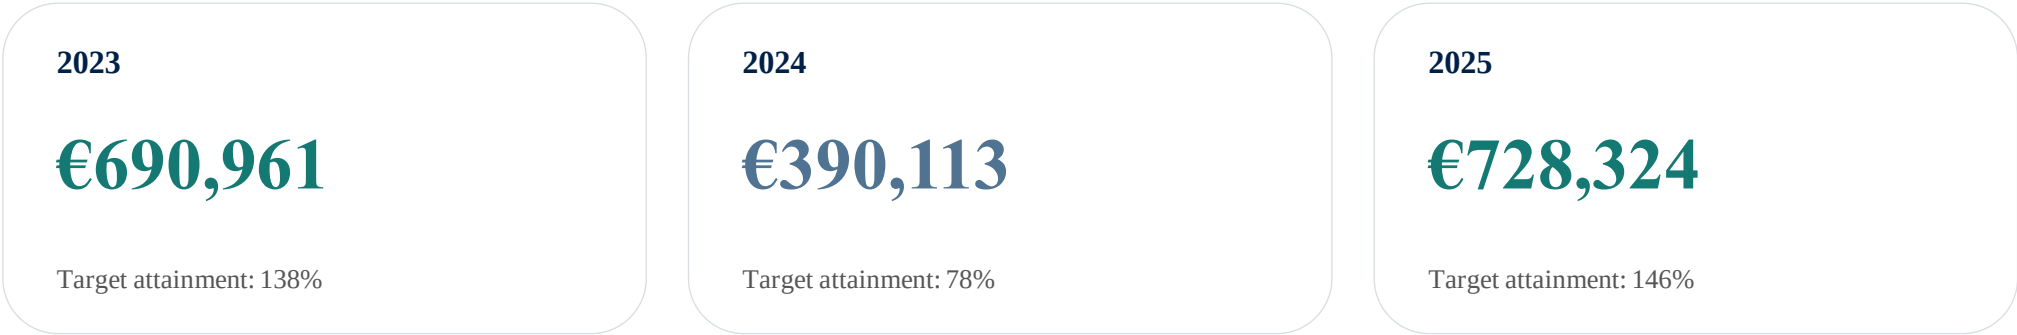

What is measured	The total value of external funding attracted through projects and contract work initiated in the reporting period.
Recognition rule	Projects are recognised from their official start date; contract work is recognised from the date the agreement is signed.
Why it matters	The KPI supports revenue diversification, reduces dependence on tuition fees and strengthens RISEBA's capacity to attract external funding.
Strategic target	At least €500,000 in external funding each year. Erasmus+ mobility projects (KA131 and KA171) are excluded.
