Employee turnover

Indicator Description

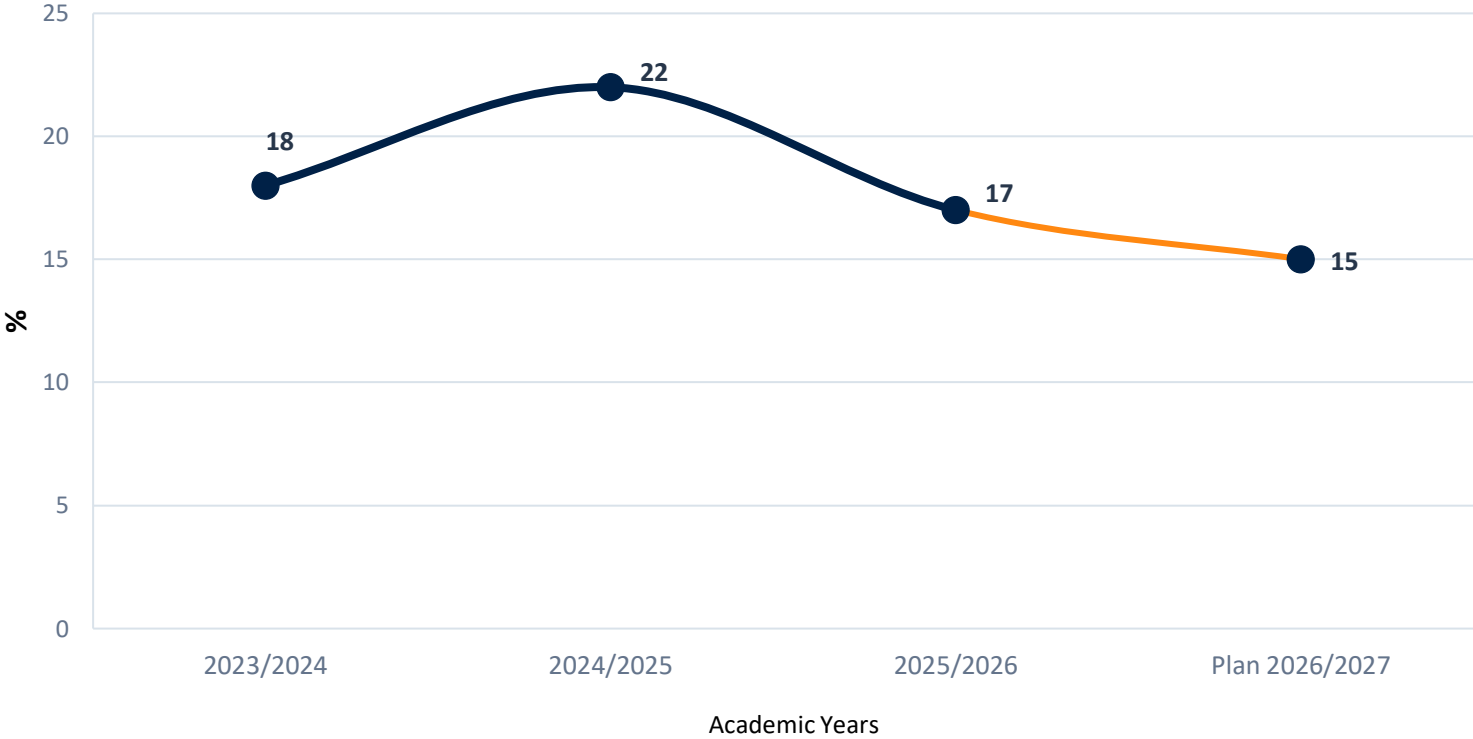

Employee turnover indicates how frequently employees leave RISEBA and are replaced by new employees within a given period. It helps assess workforce stability, the working environment, and the institution's ability to retain employees.

Employee turnover is calculated as a percentage by dividing the number of employees who left during the year by the average number of employees during the year and multiplying the result by 100.

Period: 01.10 –30.09.

Target: employee turnover **does not exceed 20%.**

Employee turnover has declined after its peak RISEBA

15.0%

2026/2027 plan

Turnover is planned to decrease by a further 2.0 percentage points versus the 2025/2026 actual.

The plan period is shown on the horizontal axis
